

MEMORANDUM FOR: Executive Officer, IC Staff

SUBJECT: USIB/IHC Weekly Activities Report

I. NEW ITEMS

25X1

B. Community Inventory of Automated Data Systems (CIADS):
IHC is responding to an official Navy request to provide selected information from our CIADS [redacted] a classified Navy contractor. This work is being done by our newly-arrived summer employee, and the task should be completed by 26 May 1975. Action officer: IHC/[redacted]

25X1

25X1

II. ON-GOING ACTIVITIES

A. Imagery Dissemination in the Washington Area: The first meeting of the IHC Ad Hoc Working Group took place on 19 May, and was largely devoted to briefing the members on the current status of LASERFAX planning. Also, C/IHC has followed up on Dr. Clarke's instruction to meet with CIA Comptroller representatives to address current funding. This meeting, also attended by CIA/OC, took place on 20 May and was friendly and productive. We seem to be back on track with the Comptroller and DDA, and the latter has authorized OC to start providing technical support for LASERFAX. The next step, now underway, is for OC and DDI/DDS&T representatives to produce a statement of the technical characteristics and funding profile for LASERFAX and this will be forwarded to CIA Comptroller from OC, via DDA, after review by C/IHC. That document should be ready early next week. CIA Comptroller accepts in principle the need to find funds. Action officer: IHC/[redacted]

25X1

B. National Imagery Plan for Satellites (NIPS). The first draft of Part I of the Dissemination Annex was submitted to []

[] on 16 May 1975. Action officer: IHC []

C. Project CONTEXT: At a 16 May meeting of NSA and ICS representatives, it was agreed that several modifications and additional software developments for CONTEXT would be explored by NSA at once. These include investigation of what type of large screen display can be added to the CONTEXT terminal as a slave so that the screen can be visible to a group in a conference room. Also, to be explored is the feasibility of using NSA's

[] net for a dedicated second voice line between the four planned CONTEXT installations (at State, NSA, CIA, and DIA/Pentagon). The CONTEXT CRT and voice equipment and its present capabilities were demonstrated to General Wilson and

[] on 19 May, using the existing configuration of two terminals at NSA and one at the IHC Staff offices in Langley. On 20 May, one of the NSA terminals was relocated to the CIA Operations Center, and this brings into being the 3-station network which we will use for a 3-4 month test period. NSA is continuing to add software capabilities to CONTEXT. We are also beginning to develop planning factors for the eventual installation of an operational system, which will require funding in FY-76. Action officers: IHC/[] PRD []

D. NOIWON: Several tests have been carried out this week to check watch office procedures in the use of the NOIWON network during all watch periods (day and night). The maximum time to establish a NOIWON conference has been 55 seconds. Tests will continue. Action officer: PRD/[] IHC/[]

III. STUDIES - none.

IV. STAFF ACTIVITIES

[] summer employee, reported for duty on 15 May. He will be working with the IHC Staff for about two months. He will be involved primarily in organizing data for the IHC Community Inventory of Automated Data Systems.
